SMASH Trivia - App Map

Annotated Wireframes: Smash Trivia Functionality

Legend: For text in *italic*, refer to style guide for hex #, font, and dimensions.

- 1 Splash screen loads for 3 seconds, then transitions to Login/Sign-up. There are no active or tappable areas on this screen.
- 2 Login button (refer to *Primary button style*) will always be active and tappable, linking to the Login screen (annotaton #5).
- 3 Create an Account button(refer to *Secondary button style*) will always be active and tappable, linking to the Sign-up screen (annotation #9).
- 4 Terms and Service and Privacy (underlined text) will be tappable, linking to an overlay. *Overley not yet included, agreements are being negotiated.*
- 5 If users have a pre-existing login, they may enter their username and password here. The form fields will be in the *inactive state* (refer to style guide) until the user taps into the field. Once the user taps into the form field, the form field will become active in the *focus state* and iOSkeyboard will appear. The suggested "Username" and "Password" text will disapear once user begins typing.
- 6 Login button will be in the *Disabled button* state until the username and password have both been entered. Once form fields have 8-20 characters, disabled button will become active in the *Primary Button style* and user will be able to tap it. If the username and password do not match, the incorrect form field will be outlined in red (refer to *form field error state*).
- 7 The underlined text link Forgot Your Password? will be prompt an overlay to have your password texted to your phone number or to create a new account.
- 8 Users will be able to tap the arrow and text field "Back" and return to the Login/Sign-up screen.
- 9 In order to create an account, user must create a username and password. The password must be re-entered twice to ensure it matches. Form fields will go from the *disabled state* to *focus state*. Suggested text within form field will disappear once user begins typing (refer to annotation # 5).
- 10 Refer to Annotation # 8

- 12 The Create an Account button will be in the *Disabled button state* until the username, create a password, and (matching) confirm password fields have been entered. Once entered, the Create and Account button will become active in the *Primary Button style*. Form fields have a minimum of 8 characters and a limit of 20.
- 13 Join Now button will be in the *Disabled button state* (in terms of hex) until live trivia time 7:15 EST. If it is the time of live trivia, button will be in the active *Giant button* state. Join Now button links to the Trivia Question screen (1 of 3).
- 14 Leaderboard will not have any tappable functionality for the user. It will display the top 5 players after each live game.
- 15 In the tab bar, the navigation consists of 3 pages. Active icon will be represented by active hex #F06491. If not selected, inactive will be represented by disabled hex # 8D8D92. The active icon (peach) will always link to the Trivia Homepage represented here.
- 16 User will be able to share a link to app via iOS user preference.
- 17 This screen is the transition between the Trivia Homepage and Trivia Question (1). It lasts 3 seconds, visually represented by 3 peaches. As 1 second goes by, 1 peach disappears from the screen. There are no tappable areas on this screen.
- 18 The tab bar navigation will disappear during trivia questions and replaced with a timer counting down 10 seconds.
- 19 Each question will have 4 possible answers in the *Primary Button style*.
- 20 Refer to annotation # 20.
- 21 This text link button will allow users to exit the game and return to the Trivia/Home screen.
- 22 If user answers the question correctly, they will be reach this screen. The timer will last 3 seconds.
- 23 This screen reverts back Trivia Question page; however, with a different multiple choice question. For functionality, refer to annotations # 18-21 for Question 2 of 3 and 3 of 3.

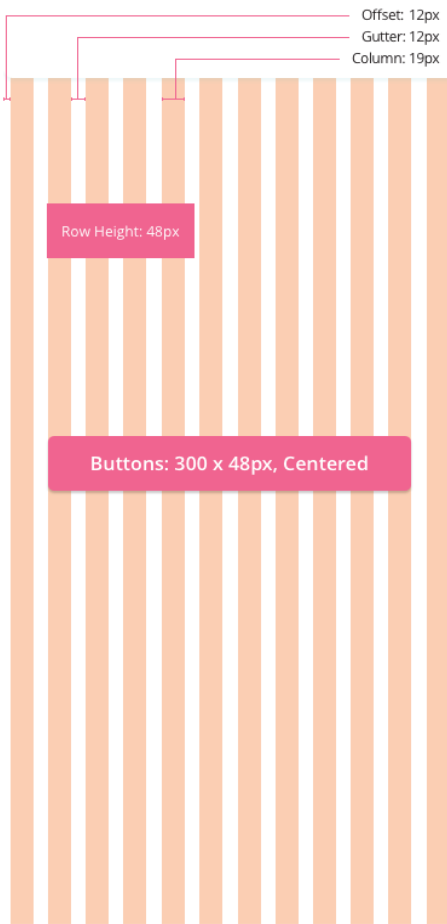

- ②4 User is able to exit this screen by tapping text link Finish, returning to Trivia/ Home.
- ②5 Learn More in the Forum is a *Primary Button style* linking to threads in the Forum that are related to the correct answer of the question. For example, Correct answer is “Consent.” If user taps this button, they will be go to threads that are about “Consent.”
- ②6 Return to Home is *Secondary Button style* linking to Trivia/ Home.
- ②7 Refer to annotation # 25 and 26 for functionality.
- ②8 Reply is active and tappable text that will link you to the screen Reply to Thread.
- ②9 The back arrow and “Back” text are both tappable and link the user to Forum/ Home.
- ③0 The search bar is in the inactive state represented in this wire frame. Once tapped into, user will be brought to the Forum Search screen (annotation #31).
- ③1 Once user taps into the search bar, it will come into an active focus state. The remainder of the screen will have a blank overlay and the iOS keyboard will appear.
- ③2 Cancel is active text. When user taps text, they will be exited from the search overlay and return to the current forum screen.
- ③3 As user types into the the search bar (in active focus), predictive search will suggest related threads. Error state for search currently is blank, no suggestions will be made and user will have to Cancel (annotation # 32).
- ③4 Users can tap into thread summary (entire field), linking to Forum Thread screen.
- ③5 The number represented between the arrows is an upvote or downvote in popularity. If user taps the up arrow or down arrow, the number will increase/ decrease by 1.
- ③6 The *Floating Action Button* brings the user to the New Topic (Forum) screen and is in it’s fixed position as the user scrolls through threads.
- ③7 The Forum section of the app has a Segmented Navigation bar in the header. The Forum/ Home screen always opens to Popular in the *segmented nav active* style. Recent is styled in *segmented nav inactive* text. Recent always links to the Recent (Forum) screen.

Forum Thread Screen: Within a thread, comments are divided into 2 part segmented navigation based on popularity and time of post.

- 38 Back arrow links back to last page user was on.
- 39 Reply links to the Reply to Thread screen and is styled in *Active navigation Side Text*.
- 40 Cancel links back to the Thread user is responding to, and is styled in *Active navigation Side Text*.
- 41 Submit link will be styled in *Inactive navigation Side Text* until user fills text box with a minimum of 10 characters. At 10 characters, Submit link will be styled in *Active navigation Side Text*.
- 42 Text field will be in Form Field - Inactive State until tapped into. Once tapped, field will change to Form field Active/ Focus Sate will a 300 character limit.
- 43 Anonymous checkbox follows *Deselected, Selected (Active/Focus), and Selected (Inactive)* states as listed in the style guide. Checkbox is not required for user to post a reply.
- 44 Refer to annotations #30-36 for functionality.
- 45 Refer to annotations #30-33 and #36-37 for functionality.
- 46 Refer to annotations #40-41 for functionality.
- 47 Text field will be in *Form Field - Inactive State* until tapped into. Once tapped, field will change to *Form field Active/ Focus Sate*. Ask a question has a 150 character limit and Add details has a 300 character limit.
- 48 Refer to annotation #43 for functionality.
- 49 Refer to annotation # 37 for functionality.
- 50 Refer to annotation # 39 for functionality.
- 51 Logout will link you back to screen Login/Sign-up.

Consent is an agreement between participants to engage in sexual activity. It doesn't have to be verbal, but verbally agreeing to different sexual activities can help both you and your partner respect each other's boundaries.
